

The “New” OJT On-the-Job Training Program

Let CTWorks help build your workforce talent

The “new” OJT program enables you to build your workforce by hiring and training quality, pre-screened candidates with assistance of 50% or more of the employee’s starting wage for up to six months.

What does OJT offer you as a business seeking to grow and compete in today’s marketplace?

Cost-Effective Growth – Train qualified workers at 50% of their compensation for up to the first six months of employment.

Customized Development of New Hires – Train your workforce to meet specific job requirements.

Pre-Screened and Qualified Candidates – Individuals who qualify for this program will have been pre-screened, will have a career plan and are ready to be successful in your organization.

Cultural Competence – While being trained for technical skills, these new employees are immersed in your organization’s culture and brand.

Minimal Administration – Ability to participate with minimal paperwork and record keeping requirements. Swift Compensation Reimbursement – OJT invoices are reimbursed promptly.

Whether you work in a small business or large corporation, if you have a full time opportunity and can provide a minimum of 20 hours per week for training, the “new” OJT may be a great fit.
